

DigitalForge Pro AI Dashboard

Welcome! You're three quick steps from your first collection.

Activate & Set Up

1

Open the Dashboard

Go to digitalforgepro.ai/dashboard in Chrome, Firefox, Safari, or Edge on a laptop or desktop computer.

2

Enter Your License Key

On first visit you'll see an activation screen. Paste the license key from your Gumroad receipt (also emailed to you). You only do this once per browser — it's remembered after that.

3

Add Your Claude API Key

The Dashboard uses Claude AI to generate your prompts and listings. Create a free key at console.anthropic.com, then paste it when prompted. Your key is stored locally in your browser and never sent to our servers.

About API costs: Claude's API is pay-per-use, billed by Anthropic directly. A typical generation costs about **\$0.05–0.25** depending on how many products you generate and which model is used. This is separate from your one-time Dashboard purchase.

Your First Collection

Fill in your niche, art style, AI image tool, collection name, and creative vision → click **Generate** → preview and edit your prompts and listings → download everything as a ZIP (Prompts CSV, Listings CSV, and Pinterest descriptions). The Prompt Player and Resize Tool are built in for the steps that come after generating.

Free bonus included: Your purchase comes with the Brand Email Setup Guide — a comprehensive walkthrough for setting up a professional branded email address (e.g. hello@yourshop.com) using Cloudflare and Gmail, with no paid email hosting. Download it from your Gumroad receipt.

Need Help?

Email norm@digitalforgepro.ai — we respond within 24 hours. Most first-time questions are about the Claude API key step, so don't hesitate to reach out if anything's unclear.
